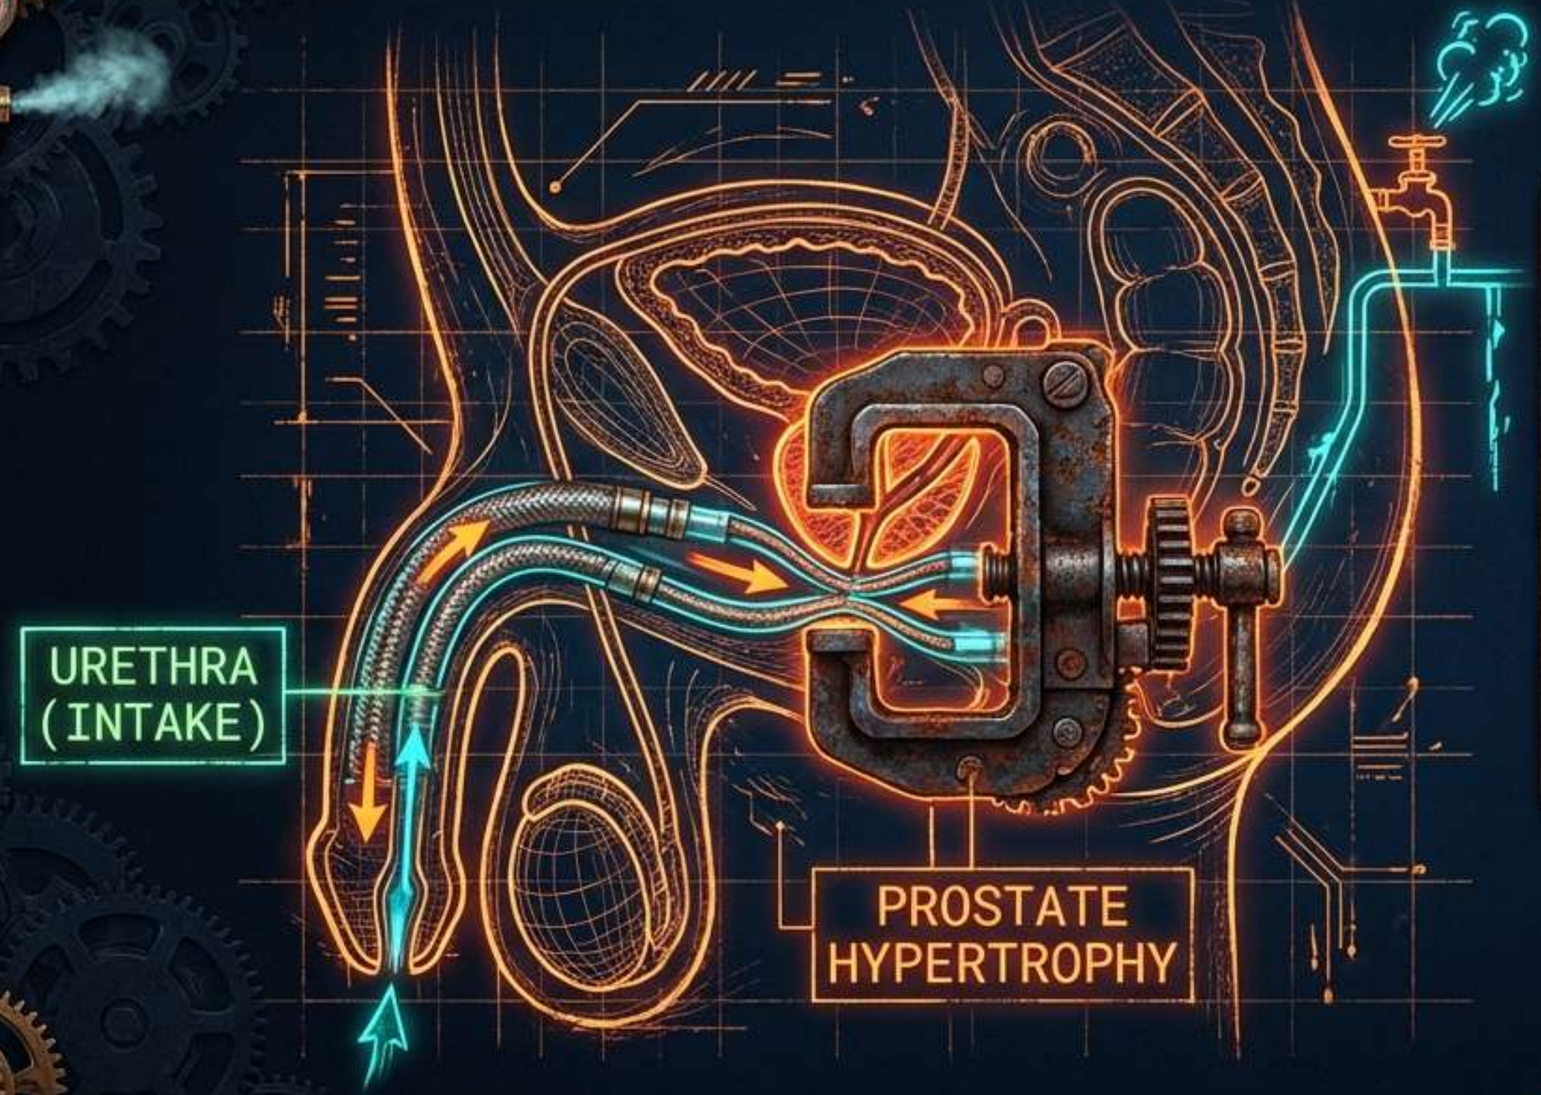
# MALE REPRODUCTIVE ENGINEERING

## PROTOCOLS FOR SYSTEM MAINTENANCE: A MECHANIST'S GUIDE

NotebookLM

# HYDRAULIC FAILURE: BPH



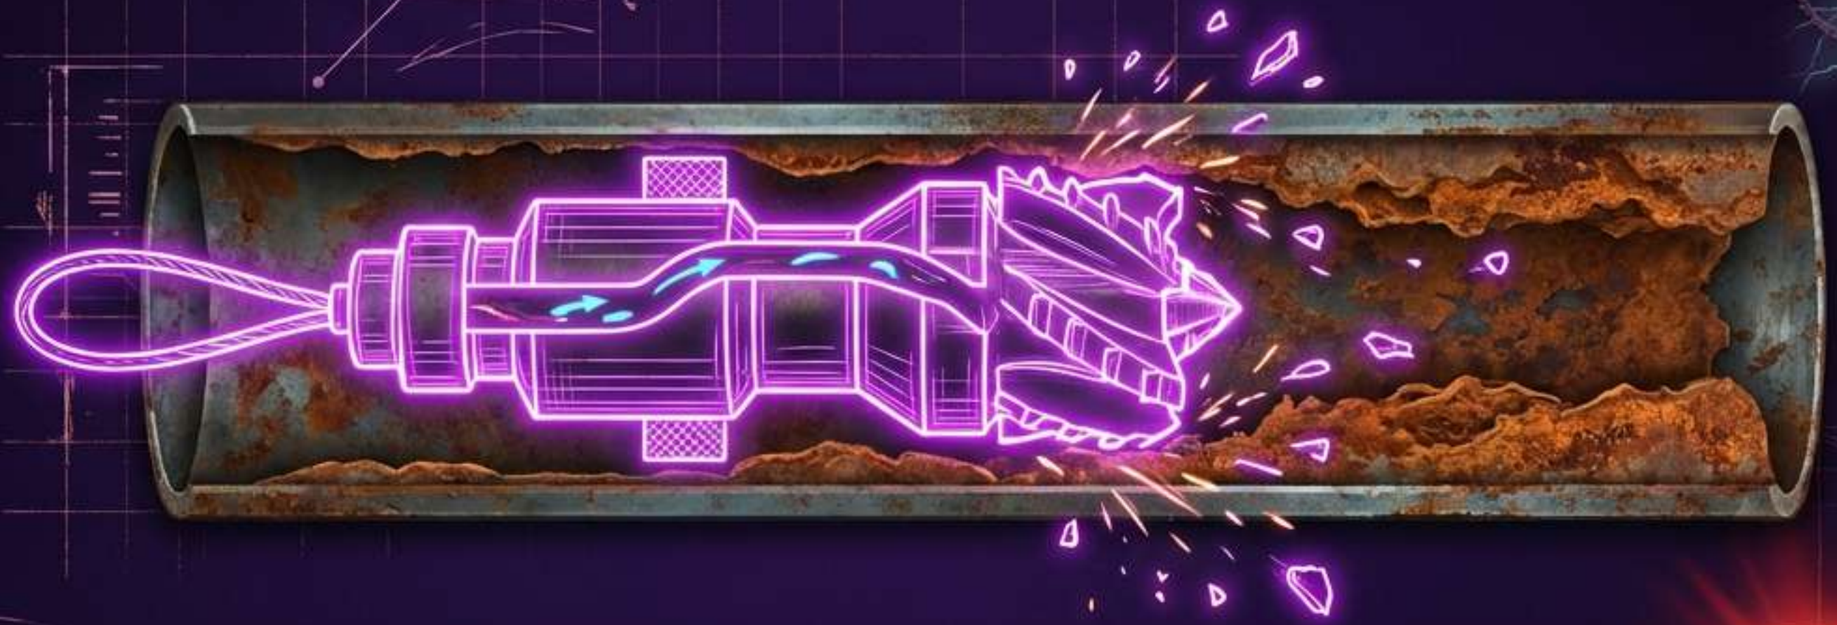
- **MECHANISM:** ENLARGED GLAND COMPRESSES URETHRA
- **RESULT:** URINARY RETENTION
- **METAPHOR:** THE CRIMPED HOSE

NotebookLM

FREQUENCY
URGENCY
NOCTURIA
F.U.N.
CAUTION
ADDITIONAL INDICATORS:
HESITANCY,
TERMINAL DRIBBLING,
FORKED STREAM
ASSESSMENT: DRE REVEALS
ENLARGED, ELASTIC MASS

NotebookLM

# THE REPAIR: TURP



TRANSURETHRAL RESECTION OF THE PROSTATE

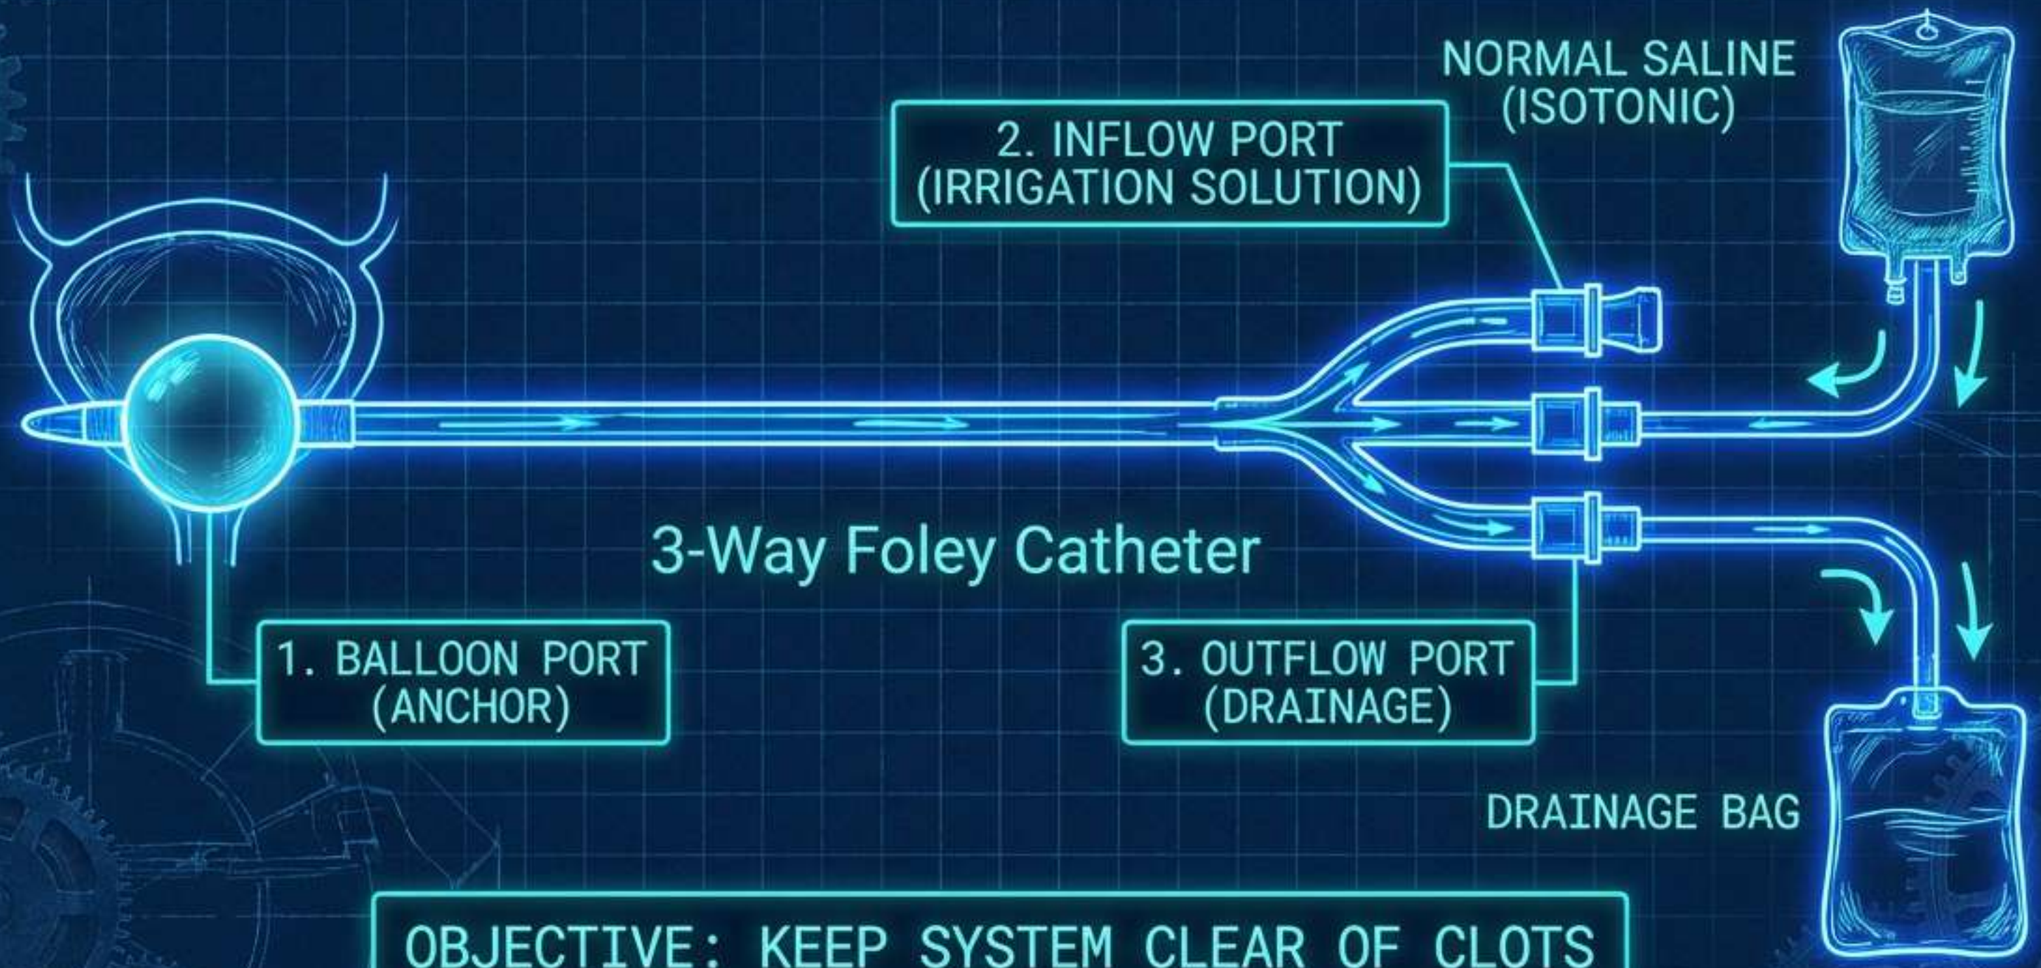
NO INCISION (ROT-ROOTER)

GOAL: RESTORE HYDRAULIC FLOW

STRUCTURAL RISK:
HEMORRHAGE / BLEEDING

NotebookLM

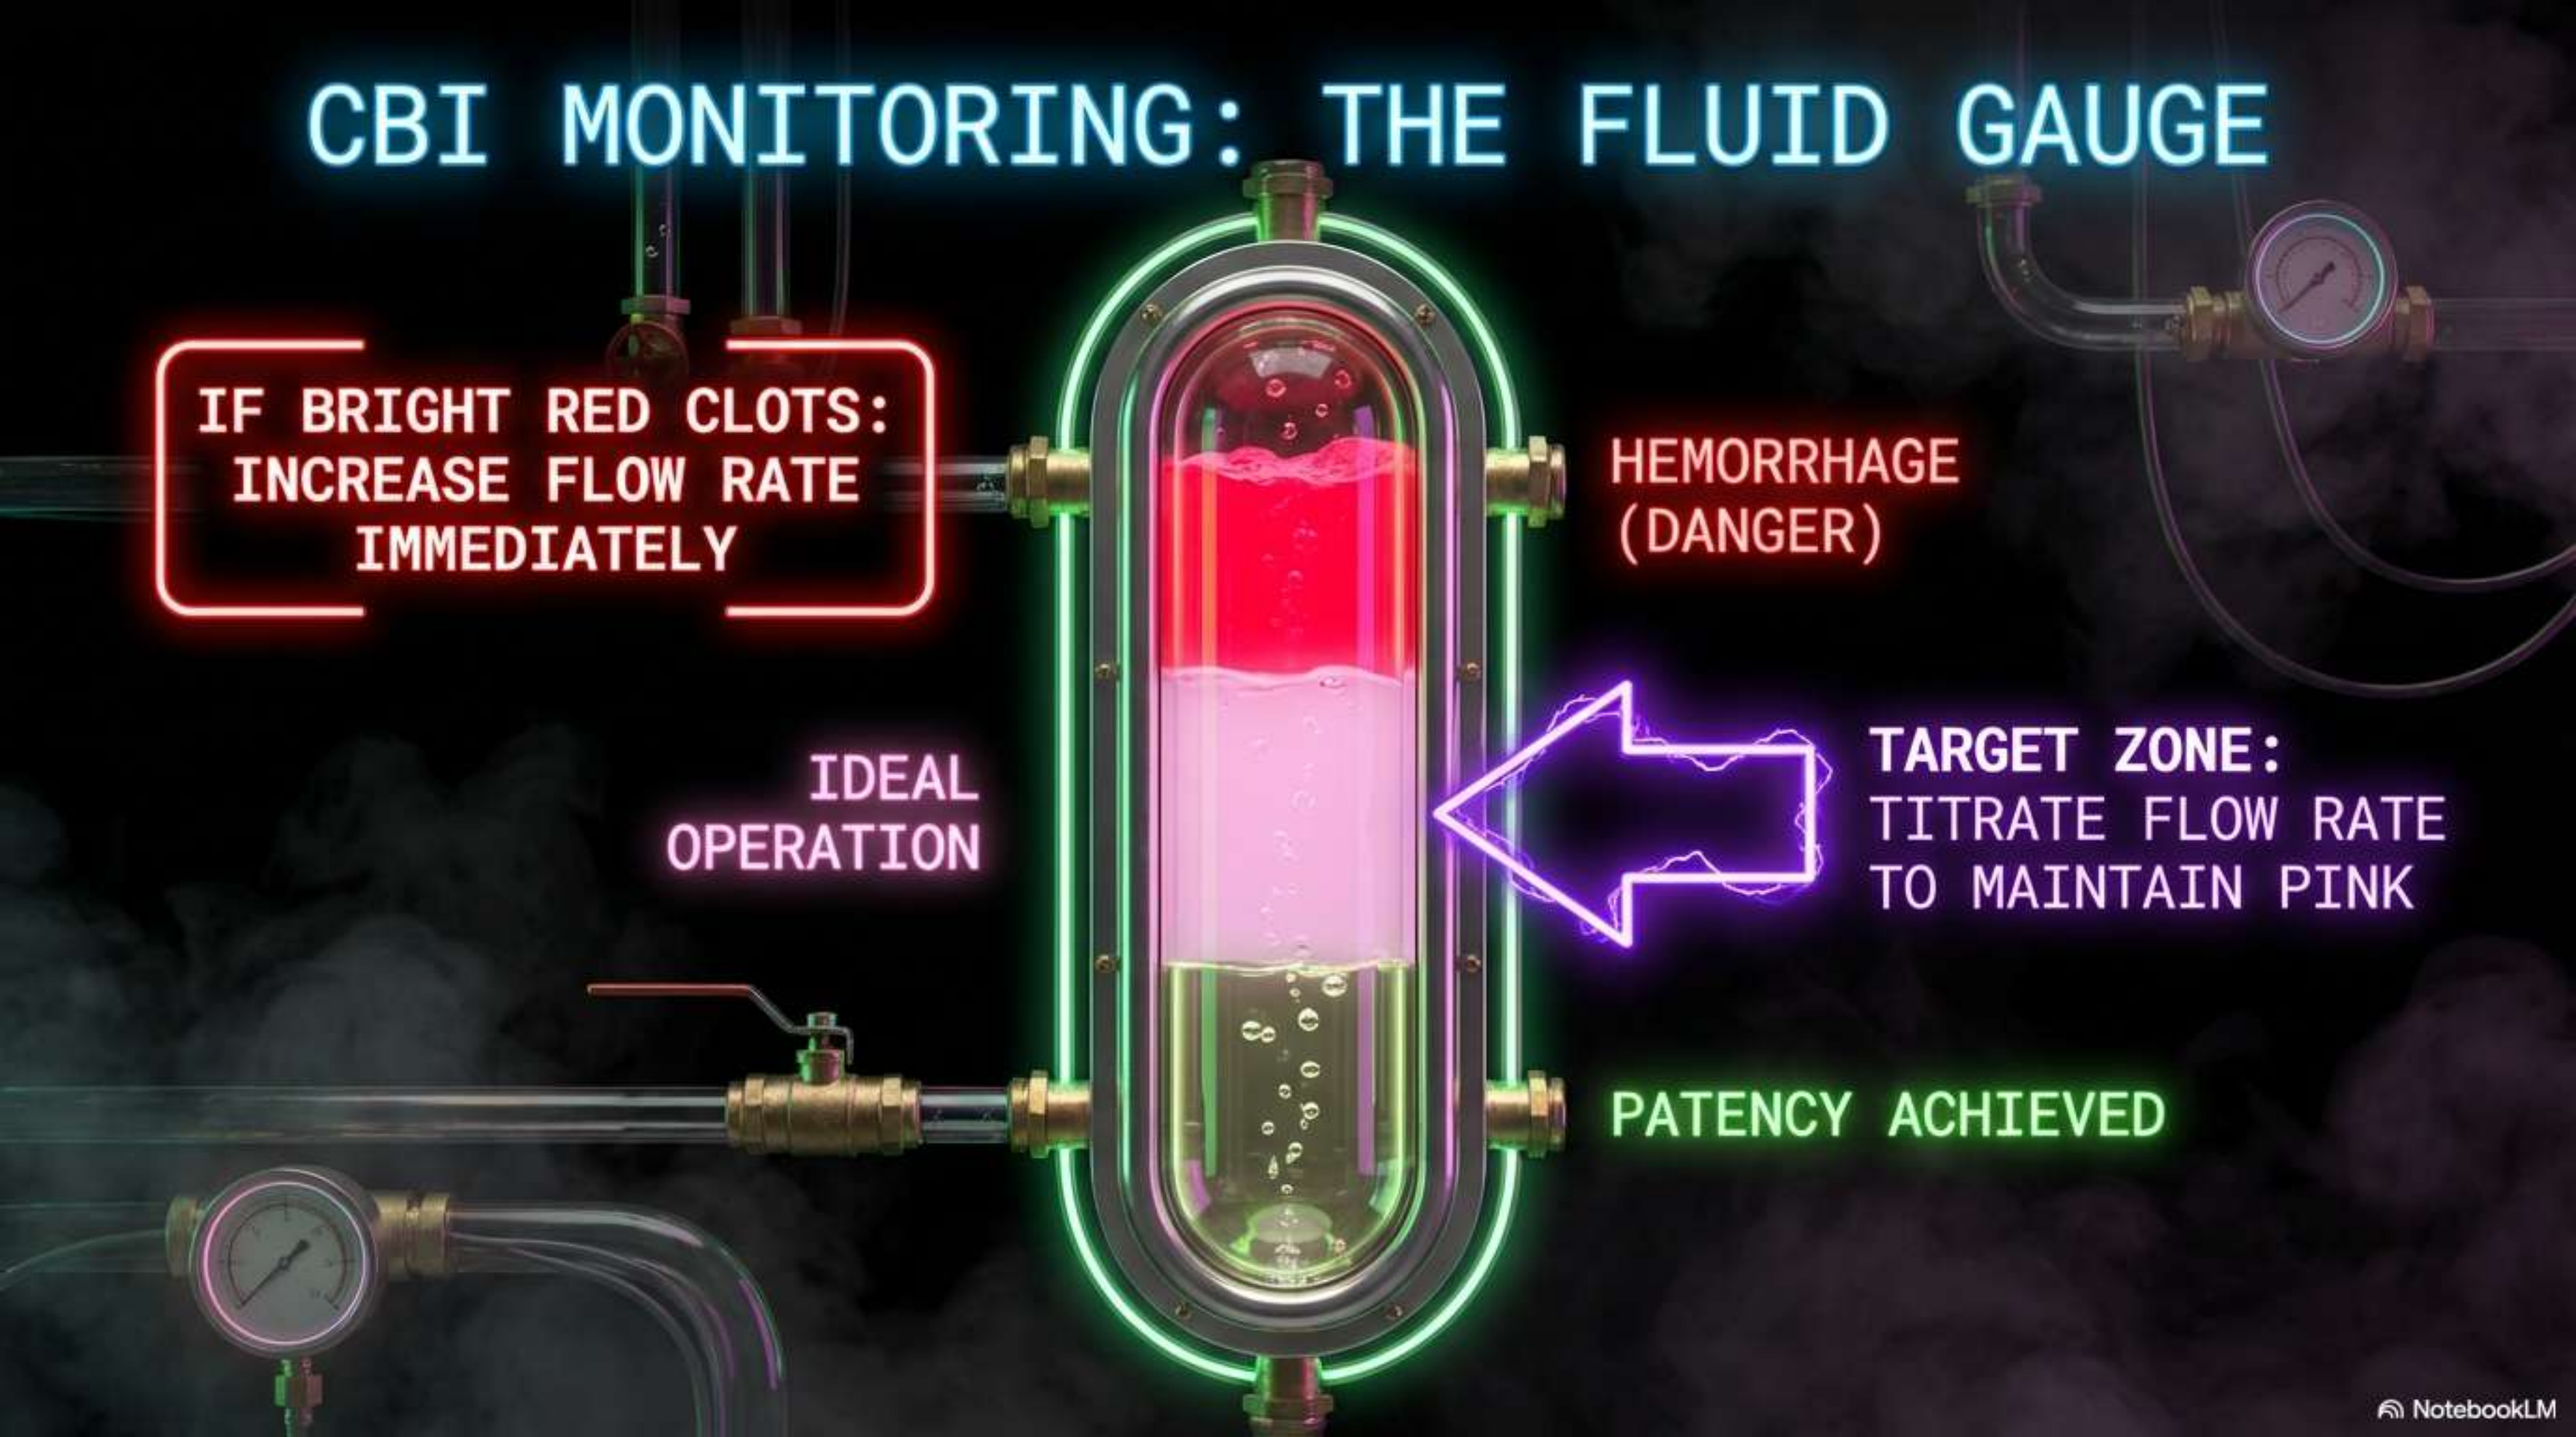
# THE CRITICAL MACHINE: CONTINUOUS BLADDER IRRIGATION (CBI)



OBJECTIVE: KEEP SYSTEM CLEAR OF CLOTS

NotebookLM

# CBI MONITORING: THE FLUID GAUGE



NotebookLM

# Rye
# TRUE URINE OUTPUT CALCULATION

| TOTAL OUTPUT (BAG) | — | IRRIGATION VOLUME INFUSED | = | TRUE URINE OUTPUT |
|---|---|---|---|---|
| 4000 mL | — | 3000 mL | = | 1000 mL |
| (BAG) | | (IRRIGATION) | | (TRUE URINE) |

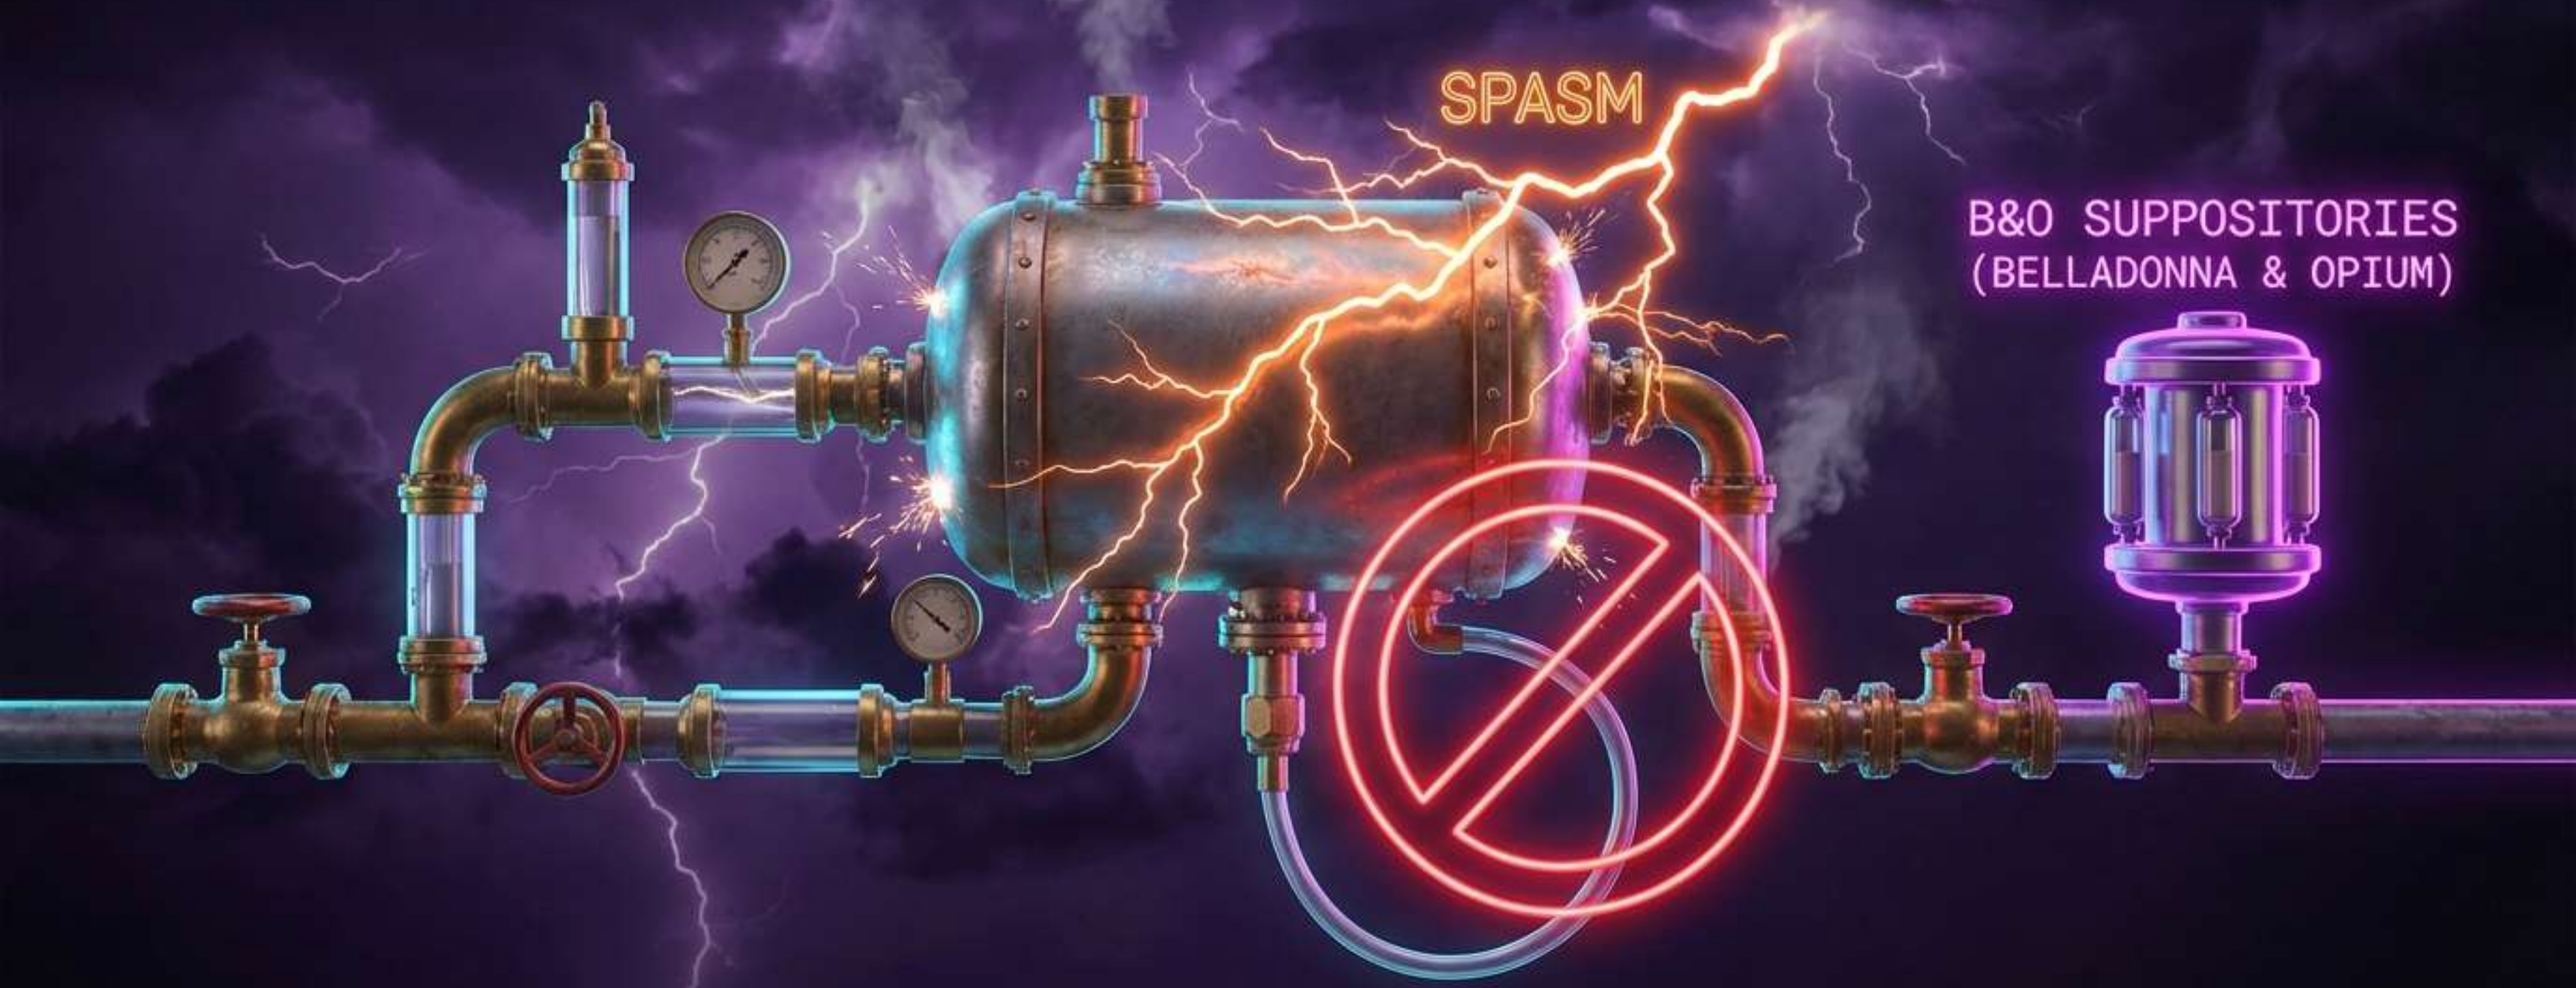
FAILURE TO SUBTRACT = FALSE POLYURIA DATA

NotebookLM

# COMPLICATION: BLADDER SPASMS

ACTION: REDUCE SMOOTH MUSCLE MOTILITY

CONSTRAINT: NEVER UNCLAMP WITHOUT ORDERS. TREAT THE SPASM.



NotebookLM

# PROTOCOL FOR SYSTEM RELEASE (DISCHARGE)

- ☐ HYDRATION: 2000-3000 mL/DAY (FLUSH PIPES)
- ☐ DIET: ACID-ASH (MEAT, EGGS, CHEESE, PRUNES)
- ☐ EXERCISE: KEGELS (RETRAIN VALVE)

RESTRICTIONS: NO HEAVY LIFTING (>10 LBS). NO STRAINING.

NotebookLM

# MALIGNANT RUST: PROSTATE CANCER

PSA LEVEL

SCREENING: PSA + DRE
(HARD, STONE-LIKE NODULE)

NotebookLM

# STRUCTURAL DEMOLITION: RADICAL PROSTATECTOMY

## REMOVAL OF ENTIRE GLAND

**SYSTEM WARNING**

POST-OP FALLOUT: ERECTILE DYSFUNCTION (IMPOTENCE)

CAUSE: PUDENDAL NERVE DAMAGE

NURSING ACTION: PSYCHOSOCIAL SUPPORT

NotebookLM

# CUTTING THE FUEL: HORMONAL INTERVENTION

- PROCEDURE: BILATERAL ORCHIECTOMY (REMOVAL OF TESTICLES)
- RATIONALE: REMOVE TESTOSTERONE TO SLOW TUMOR GROWTH

PHARMACOLOGY: ESTROGENS (SIDE EFFECT: GYNECOMASTIA)

NotebookLM

# THE CORE REACTOR: TESTICULAR CANCER

TARGET DEMOGRAPHIC:
**AGES 15 - 35**
THE HIGH PERFORMANCE YEARS

NATURE:
**HIGHLY MALIGNANT**
BUT HIGHLY CURABLE

RISK FACTOR:
**CRYPTORCHIDISM**

NotebookLM

# INSPECTION PROTOCOL: TSE

**ENVIRONMENT:** WARM WATER / SHOWER

**MECHANISM:** RELAX CREMASTER MUSCLE TO DROP TESTICLES

**TECHNIQUE:** ROLL EACH TESTICLE BETWEEN THUMB AND FINGERS

NotebookLM

# ANOMALY DETECTION: PAINLESS IS DANGEROUS

## CANCER SIGNAL

Roboto Mono
PAINLESS MASS
HEAVINESS

## INFECTION SIGNAL

Roboto Mono
PAINFUL
INFLAMMATION

NotebookLM

# BIO-HAZARD CONTAINMENT: SEXUALLY TRANSMITTED DISEASES

GENERAL PROTOCOLS: TREAT PARTNERS. REPORT TO HEALTH DEPT. COMPLETE ANTIBIOTICS.

NotebookLM

# TOXIC SYPHILIS

**PRIMARY SIGN:** THE CHANCRE (PAINLESS ULCER)
**LATE STAGE:** ATTACKS THE MAINFRAME (NEUROSYPHILIS)

**THE ANTIDOTE:** PENICILLIN G

NotebookLM

# BIO-HAZARD CLASS II: GONORRHEA

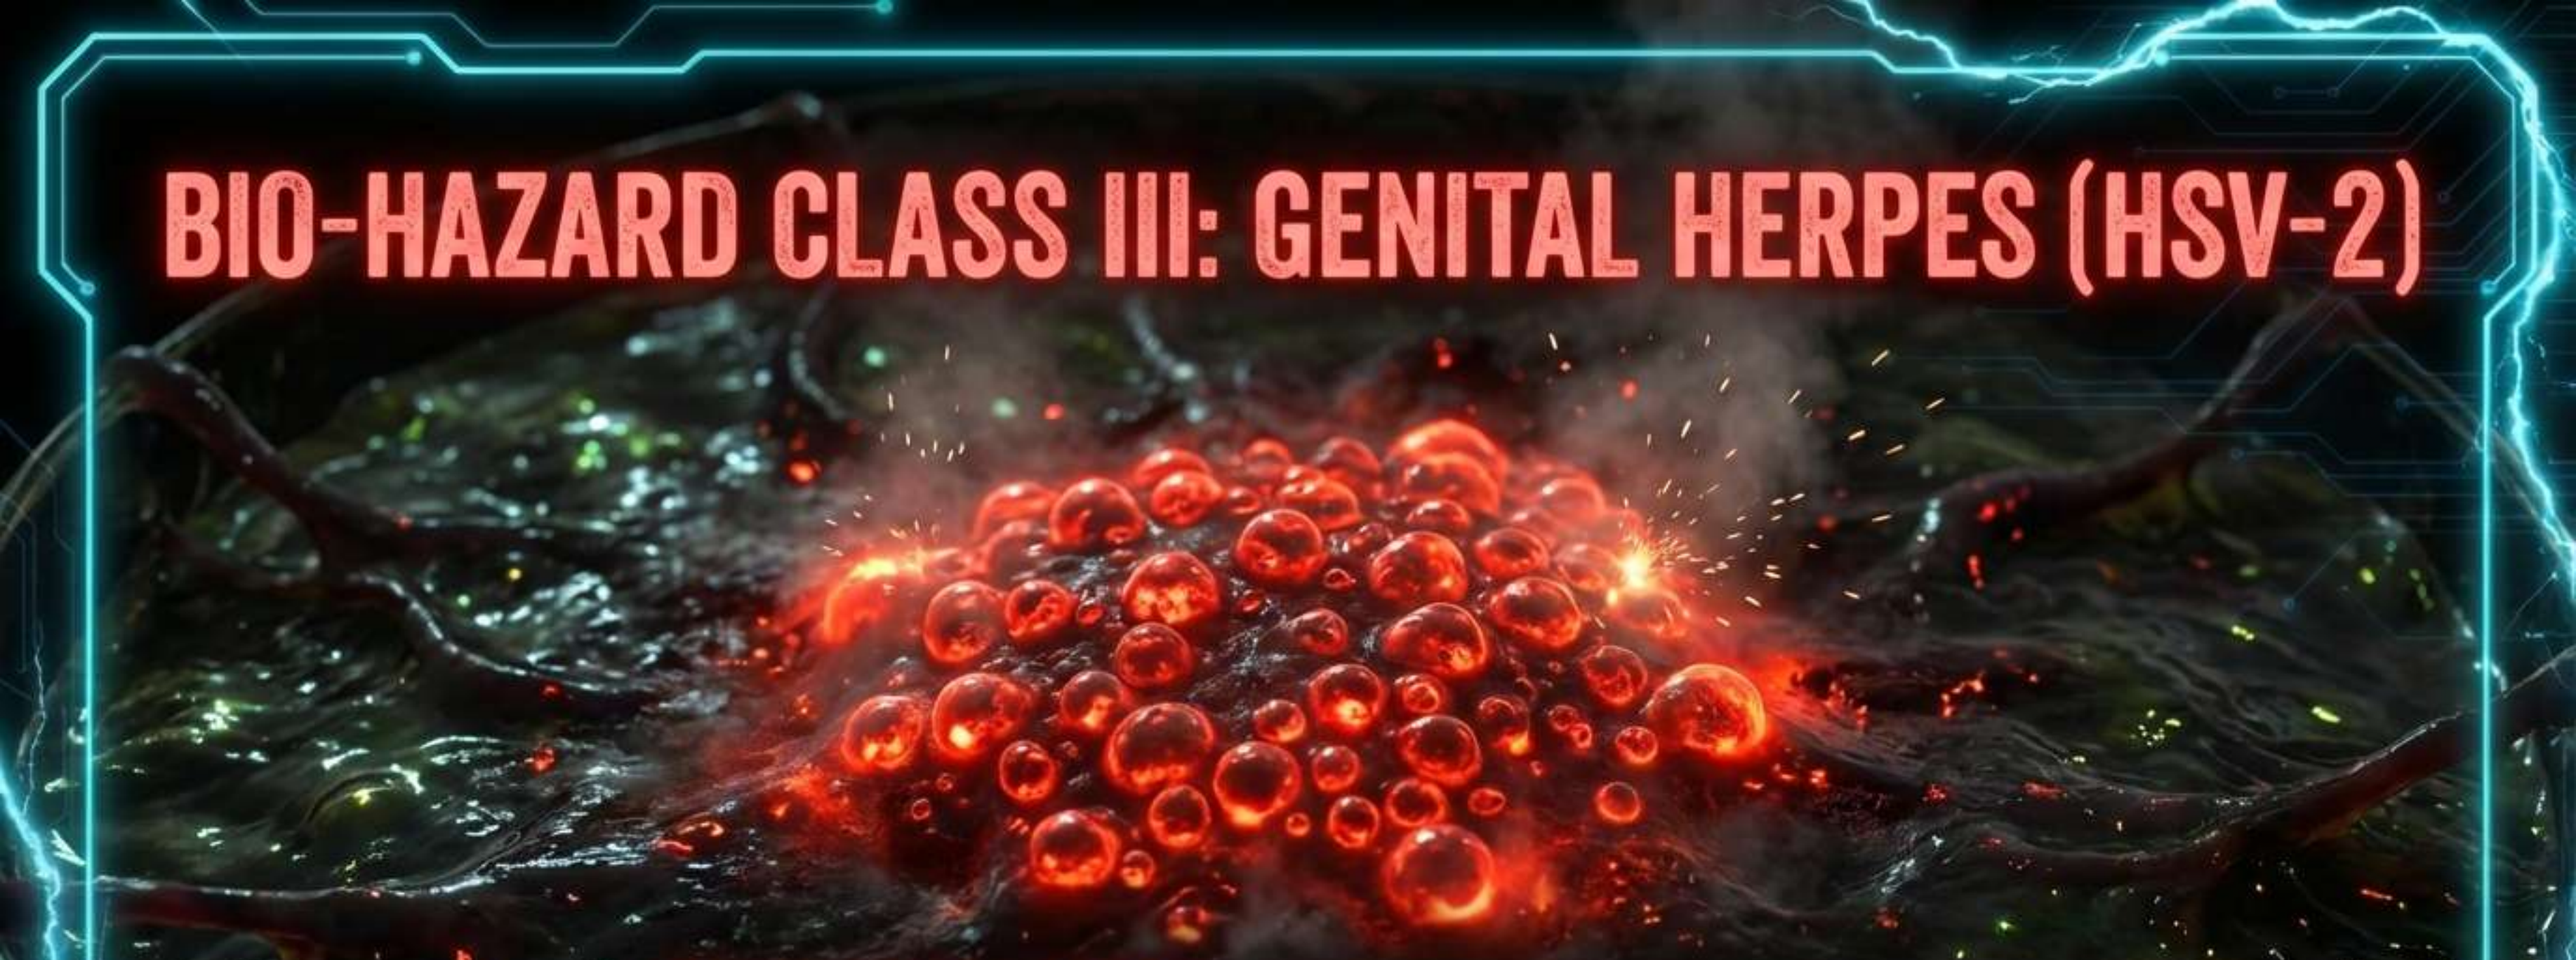
**PRIMARY SIGN:** PURULENT DRAINAGE ('THE DRIP')

**COMPLICATION (NEON RED):** PELVIC INFLAMMATORY DISEASE (PID) / STERILITY

**TREATMENT:** ANTIBIOTICS

NotebookLM

# BIO-HAZARD CLASS III: GENITAL HERPES (HSV-2)



**PRIMARY SIGN:** PAINFUL VESICLES

**NATURE:** INCURABLE / RECURRING

**THE SUPPRESSANT:** ACYCLOVIR (NEON PURPLE)

VIRAL SHEDDING POSSIBLE WHEN ASYMPTOMATIC

NotebookLM

# SYSTEM STATUS SUMMARY

PSA < 4.0
CLEAR CBI

BRIGHT RED CLOTS
PAINLESS LUMP

TITRATE CBI
PENICILLIN

FORKED STREAM
CHANCRE

PSA < 4.0
